

Introduction for Dave Friday

Brothers, allow me to introduce Dave Friday. Brother Friday was initiated into the Beta Iota chapter at Albion College on February 15th, 2002. After graduating from Albion College in 2004 with a Bachelor of Arts in mathematics, he joined the Gamma Epsilon chapter at Michigan State University while he worked through a master's degree in mathematics. He was elected CPR of Province 2 in the 2006-2007 academic year and started working as an adjunct professor of math for Grand Rapids Community College. He spent the next three years working with Brother Chris Reed to start the Rho Xi chapter at Grand Valley State University.

At the province level, after serving as CPR for a year, he held positions of Assistant Province Alumni Coordinator, Province Alumni Coordinator, Deputy Province Governor, and Province Governor. As part of the National Emergency declared on June 27th, 2019, he was removed from his position as Province Governor. Shortly thereafter, he published a statistical analysis of the data regarding province governor removal to prove with 55% confidence that Mark lied to us all.

Now, he is working through his tenth year as a full-time professor of mathematics for Macomb Community College in Clinton Township, MI. He remains very active within the world of mathematics, serving as head coach for Michigan's team for the American Regions Mathematics League, and AMC Coordinator for the Michigan Section of the Mathematical Association of America. The title of his talk is "Almost Right Triangles and the Almost Pythagorean Theorem." Brothers, I am pleased to introduce, me.
